### Selling AT&T Synapse is easy, thanks to features like:

- **High-end functionality at a great price**  
Offer customers premium features they can afford, like SIP, PRI or PSTN options, voicemail-to-email messaging, cordless headset compatibility and even support for up to 4 auto attendants.
- **Simple networking**  
The on-premise system creates a site on the customer's network via Cat5. Plus, there are no hidden costs, annual subscriptions or licensing fees, ever.
- **Easy installation**  
Setup takes 1/3 of the time of competitive systems, so you spend less time onsite and more time generating revenue.
- **Expandability—and profitability**  
Synapse manages up to 55 lines with up to 100 devices on a single network, giving you additional revenue opportunities as your customers' needs grow.
