

Founded in Hong Kong in 1976, VTech is the largest supplier of corded and cordless phones in North America.

VTech has played a defining role in the development and expansion of the global telecommunications market over the past decade. To meet market demands, VTech has introduced several new generations of cordless phone platforms, each incorporating more advanced technology, better quality and significant feature enhancements.

While maintaining a high level of product quality, VTech has made changes and advancements to the production process to decrease the quantity of hazardous materials used in phones. VTech adheres to and exceeds the strict European Union RoHS guidelines restricting the use of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants. While this initiative has not yet been adopted in North America, VTech has taken a pro-active position to incorporate RoHS compliance in the production of all phones.

VTech is committed to making a difference in improving the sustainability of our planet. Our new line-up of environmentally friendly products and packaging is the first step towards living in a greener, cleaner world.

In addition to reducing hazardous materials, VTech has been manufacturing ENERGY STAR® certified products for over two years. Choosing an ENERGY STAR product means that the product has met strict energy efficiency guidelines set by the Environmental Protection Agency (EPA) and the Department of Energy (DOE). VTech achieves this by decreasing the amount of electrical wattage used by their phones.

All VTech phones are packaged using 100% recyclable materials. Recently, VTech reduced its plastic use in packaging by 50%. VTech is also a participating member of the Rechargeable Battery Recycling Corporation (RBRC) which works towards keeping a variety of rechargeable batteries out of landfills and preserving our natural resources. All of these efforts are aimed at supporting our goal of delivering products that truly are Designed to fit your home. And your life.™
