

Solutions for your
Conference &
Meeting Spaces

Conference Calls Impacting Your Meeting Space Revenues?

You're Not Alone.

Most users agree that good sound quality is critical to how effective their conference calls are.

Yet, most find that factors like call clarity and background noise continue to interfere with their calls.¹ And that translates to real losses for your conference and meeting spaces.

Top Audio Conference Issues, According to Office Workers:

77%

Say **good sound quality** has a major impact on the effectiveness of calls

78%

Say **background noise** has a major impact on the effectiveness of calls

69%

Say **call clarity** has a major impact on the effectiveness of calls

75%

Can't understand two people speaking at once

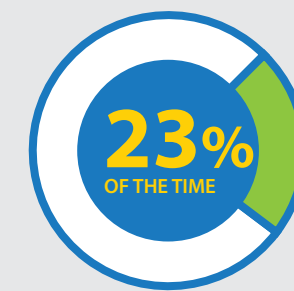

69%

Prefer landlines over cell phones because of these issues

AVERAGE TIME WASTED ON A CONFERENCE CALL MORE THAN

10 MINUTES

= **\$5.5** BILLION LOSS OF PRODUCTIVITY PER YEAR

Poor Call Quality Contributes to Wasted Time and Loss of Repeat Meeting Space Revenues.

How do you overcome people talking over each other? One interruption after another?

And background noise drowning everyone out?

With conference phones tailored to your customer's & guest's needs.

Digital-Quality
Audio

Unlike traditional conference phones, ErisStation conference phones let everyone spread out and speak without having to gather around the phone or raise their voices. That's thanks to the DECT 6.0 wireless microphones featuring Orbitlink Wireless Technology™.

Whether they are up at the whiteboard or sitting in the back of the room, your customers can talk into one of the portable microphones and relax knowing the callers on the other end can hear you—loud and clear.

- ✓ Give everyone a voice
- ✓ A new way to collaborate
- ✓ Engage everyone

Full of Features

Everything your customer needs to get down to business and keep the conversation flowing.

DECT 6.0 Technology

Place the wireless microphones anywhere in a conference room and enjoy interference-free, high-quality sound.

Premium Sound Quality

Thanks to features like full-duplex technology, digital mixing and audio equalization, nothing is lost in translation.

Ample Talk Time

With up to 12 hours of talk time on each wireless microphone, there's plenty of room for meetings that run over.

Full Room Coverage

Choose models with one fixed and two wireless mics or two fixed and four wireless mics for maximum room coverage and participation.

Charging Built-In

Magnetic charging bays in the base phone ensure the wireless microphones are always charged and ready.

Two-Year Standard Warranty

Enjoy the peace of mind that comes with an industry-leading, standard two-year warranty.

Conferencing Loud & Clear

Choose the phone that fits your meeting space needs: analog models with two or four wireless microphones or a SIP model with four wireless microphones and a USB connection for a PC speakerphone. Enable your customers to enjoy collaborative meetings that are as productive as face-to-face meetings.
