Cash in this week!

RecessionBusters!

Your Rx for big prescription savings!

Tired of paying a lot for your prescriptions? Good news! These easy money-saving methods can cut the cost of your medicines dramatically!

1 Skip your health insurance!

Surprise! Health insurance isn't always the cheapest way to buy prescriptions! If you have a high deductible and have to pay out of pocket or have high co-pays, ask your pharmacist about paying in cash: Many offer much lower prices to cash-paying customers since it saves them the hassle of dealing with insurance companies. Call around to pharmacies near you to find out what kind of break they can offer.

2 Use coupons!

Love using coupons to save on groceries? Many drug companies offer coupons, too, for, say, a free first prescription fill or \$10 off a single refill. And finding these coupons is easy! Simply ask at your doctor's office, head to your drug manufacturer's website or log on to GoodRx.com, which offers printable coupons from local participating drugstores.

Did you know?

You may qualify for free (or almost-free) drug coverage through a prescription assistance program. Find out more by visiting Partnership for Prescription Assistance at pparx.org or calling 888-4PPA-NOW.

3 Try an Internet pharmacy!

Worried that online pharmacies aren't safe? You can try them now! Trusted ones—like HealthWarehouse.com and TelDrug.Healthcare.Cigna.com—have a Verified Internet Pharmacy Practice Sites (VIPPS) seal that shows they've been checked out by state boards that license pharmacies. And they're usually cheaper than a traditional pharmacy because they get volume discounts directly from manufacturers. Find more safe online pharmacies at NABP.net/programs/accreditation/vipps/find-a-vipps-online-pharmacy.

4 Snag a price match!

Want the convenience of getting all your medications from one pharmacy? Call around and find out which ones offer a price-match guarantee. Then, log on to GoodRx.com and plug in your medications and ZIP code. You'll find the lowest prices in your area, which you can then show to the pharmacist so you can get all your meds at the lowest cost in one place!

Don't leave behind cash when flying!

Flying to visit family or friends for the holidays? While most of us who go through the airport security remember to take our keys, purse and shoes, more and more of us are forgetting the loose change we placed in the

bins. As a result, the Transportation Security Administration's wallet is getting \$400,000 fatter every year! To never leave your money behind, put it in something you're sure to remember to take with you—like your shoe!
